**TO: EVERY ONE IN THE SOUTH SUDAN ALTERNATIVE ENERGY  
CONFERENCE DETROITE MICHIGAN**

After a long week conference in Detroit, here we are extended our gratitude thanks to you all the Mohicans, we are very please to meet you all, our government of south Sudan would appreciate making business with you. Its importance for us to explore all those opportunities for newly found country of ours, the South Sudan. South Sudan has been in relationship with U.S.A for many years now and The Government of South Sudan is highly welcoming all the investor, contractors, missionaries to come help us develop the country which has been torn part by 50 years war conflict with the dominant North Sudan. In 2005 we have singe comprehensive peace agreement (CPA) with North Sudan which granted us peace and security for 6 years until we vote for a referendum of self-determination. We are very please to see all varies international investor in South Sudan to help bring recovery in the country. We are still looking forward seeing more coming to invest in these multimillion dollars projects challenging country is facing, we require expertise at all varies institutions we have.

The conference we have went very well, though its center it search in renewable energy for south Sudan, we also welcoming any body who can invest in the country, in another hand they also helping country develop quickly in their big business, think of it you are helping a country that has never have infrastructures before and the country is try it best to come in to face of the world, you would be very welcome you know. South Sudan is very friendly country and very rich in natural resources. The country huge income is from oil revenue, which share between South and North, so if you are convinced with the passed conference or you want more information feel free to come to South Sudan and you will be meeting us. Steve Lowell will also help you understand more about investment in South Sudan,

According to our message last time we want some investors, contractor, missionaries in field of renewable energy and others. the directorate of renewable energy in government of south Sudan is asking for means of alternative energy, we are facing huge cost of gas fuel consumption by generators running governmental building and its has been

identified that huge amount of money are wasted to this huge generators, I as director for renewable energy in the country thought of it and I decided to explore the needs of alternative energy in the country, I new it then I can be for great help in this department, for country huge demand of electricity they are facing, I will work with any one who can bring the right technology to the country of south Sudan at reasonable amount of money.

Every technology I met in Detroit according to my knowledge will all be very helpful to the government of south Sudan and foremost we will help the local citizens change their living style, a lot a jobs will be created in the present of a little or big investment every one of you can make, southern Sudan believe in good friendship and they believe U.S.A local citizens have contribute into the peace we have today, so the only way we can pay you back is to thank you and encourage to come and invest in the country that appreciate your investment most.

We advice every one to have contacts with us before you come to south Sudan to secure every way of making your business safe, there are few numbers of paper work we can help you with and that is where Mr. Steve Lowell will play great roll at, he will work hand-in-hand with us in south Sudan until your arrival, every one of you who think to be there in the beginning of the years you will call Timothy Tutlam the director of renewable energy for south Sudan in the main city of south sudan (Juba) we look forward of seeing you all in the future and once again we appreciate your time and support you have giving us during conference in Detroit Michigan victory Hotel. We believe there shall be more conference to come in the future either Detroit or some where else in U.S.A, foremost we extend our thanks to Mr. Steve and Professors Jiempladel and Debra for the hard work you have put together for us. We are looking forward to do more with you, your hard work its not only being appreciate by us, its also appreciate by the all country of South Sudan local citizens and (GOSS) the government of south Sudan, we will make you meet all high profile leadership in the country to extend your moral hardworking to more in the future.

Thank you very much.

Your sincerely
